3D Viewer
## View 3D CAD files from within Arena

OVERVIEW

Your teams need a way to simplify and streamline complex product development and launch processes. Powered by PTC technology, Arena's 3D Viewer helps your internal and global teams share and review 3D CAD product designs across dispersed internal teams and supply chain partners.

Arena's secure in-app web-based 3D CAD file viewer accelerates processes managed in Arena including product development, change orders, CAPA, complaints, and supplier collaboration. Your extended product team—even partners—now can view, validate, and access 3D CAD models stored in Arena.

KEY BENEFITS	WHAT ARENA 3D VIEWER DOES
✓ **Easy to use and provision**	• Requires no downloads or additional logins for teamwide 3D visualization • Enables secure 3D CAD viewer access internally and externally controlled by Arena file policies • Needs minimal training and is intuitive to manipulate • Limits licensing costs for design applications • Supports STEP, IGES, STL, PVZ, GLTF • Adding support for additional formats in future releases • Powered by PTC technology
✓ **Enables multidiscipline visualization of mechanical designs**	• Expedites cross-functional design reviews and approvals • Simplifies validating 3D model against 2D drawings • Helps to verify parts more quickly • Provides mechanical information to facilitate quoting

3D CAD VIEWING FOR ALL

With the Arena 3D Viewer, all product team members can visualize 3D CAD designs.

To start using the 3D Viewer today, contact arena-sales@ptc.com.
